

Confederation of Indian Industry

CII International Conference on Cyber Security

7 June 2019: Le Meridien Hotel, New Delhi

Cyber security is disruptive and game changing. As more stakeholders - from governments and businesses to citizens and customers - move online, billions of devices and humans get increasingly inter-connected, and cyber threats increase in complexity, severity and impact. Threats and vulnerabilities are growing rapidly with the move to cloud and mobile. Cyber criminals are proving very adept and skillful at using the latest digital technologies and exploiting the loopholes and vulnerabilities in cyber world.

Indian economy, now among the world's top five, faces increasing cyber threats. It is important for Indian businesses to be prepared for cyber incidents and manage cyber risks effectively. The year 2019 is likely to see more nation states, including India, coming up with dedicated cyber security laws to define the roles, duties and responsibilities of various stakeholders in the cyber security eco-system. Being borderless in nature, cyber security would also require collaboration among nation-states and multiple stakeholders to win the fight against 'cyber criminals & terrorists.

In this context, ***Confederation of Indian Industry (CII)*** is organizing the **International Conference on Cyber Security** on ***7th June 2019*** at ***Desire Hall, Le Meridien Hotel, New Delhi***. The conference aims to provide a 360-degree exploration of cyber security and facilitate development of a cyber resilience strategy. Few key topics that will be covered during the sessions are as follow:

- Building a robust cyber resilience framework
- Impact of Emerging Technologies in the Cyber Landscape
- Evolving role of CISOs; Cyber Forensics and Digital Investigations; Deep and Dark Web; Fake News / Misinformation Campaigns, Skill Development and Diversity

Speakers, panelists and delegates at the conference would include Government officials and policy makers, academics and thought leaders on cyber security, corporate leaders from various sectors, cyber lawyers, entrepreneurs, investors, OEMs, integrators and solution providers, as well as customers, citizens, civil society representatives and end users. Coming together of multiple key stakeholders will help promote better understanding of each other's strengths, capabilities, limitations and requirement of support.

The conference would provide good opportunities for diverse stakeholders to network, learn, contribute and collaborate meaningfully to raise awareness about and facilitate widespread adoption of good practices in cyber security.
